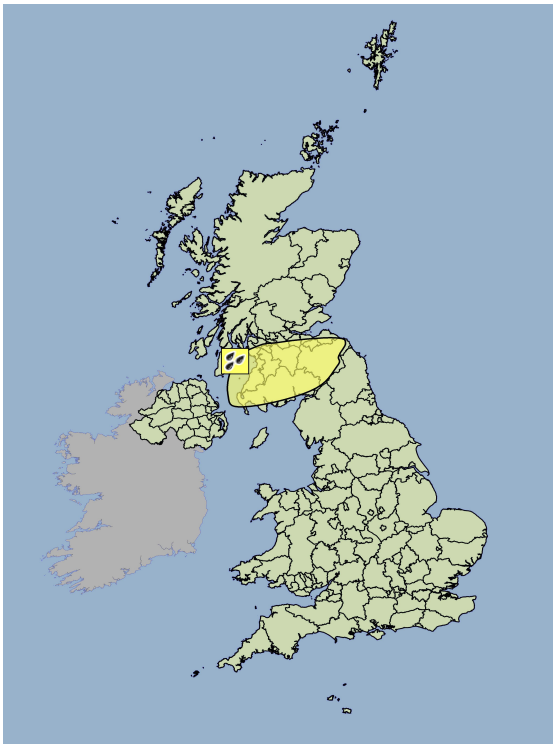
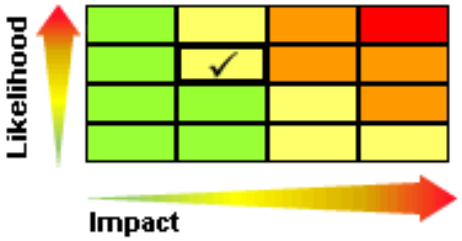
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will become slow-moving over southern Scotland, and parts of central Scotland this afternoon and evening. Around 10-15 mm is likely to fall within a 6 hour period, with 20 mm possible over southern parts of the warning area. While these totals are not particularly large, some short-lived intense bursts coming during a busy travel period could well lead to some problems.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **12:10 on Tue, 17th Nov 2015** until **21:00 on Tue, 17th Nov 2015**

An area of rain is expected to cross southern and central Scotland from the west on Tuesday afternoon, clearing during the evening. The rain will be heavy at times, and will be falling on ground saturated following recent wet weather.

Be aware of likely difficult driving conditions and the potential for minor travel disruption due to surface water flooding.
